BNX GPRS CHAT

BNX GPRS Chat

BNX GPRS Chat is a system that uses text communication between staff in charge of monitoring and fleet operators using the built-in GPS device installed and send messages with GPRS technology.

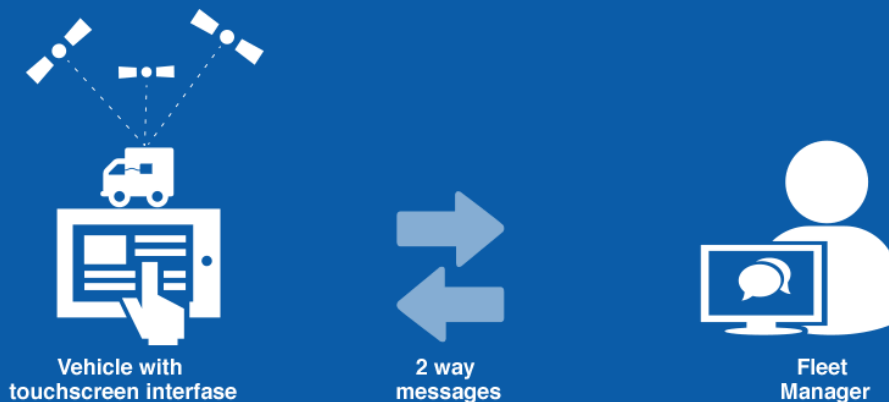

BNX GPRS Chat was developed as foolproof system using a touch screen on the vehicle and a web platform for the monitoring staff.

Benefits

- ✓ Better 2-way communication
- ✓ Cost savings in communication and requires cell service for operators
- ✓ Less distractions
- ✓ Agile communication to report events

How does it work?

A GPS touchscreen is installed in the vehicle that sends and receives text messages via GPRS.

Key Features

- ✓ Prerecorded messages
- ✓ Chat transcripts
- ✓ Message storage in areas without GPRS coverage for subsequent sending
- ✓ Panic Button
